

Semester 2 Module 4 – Discover Network using CDP

Indicate your Pod # and Console #:

Lab Partner (if any): _____

Pod	Connection

Login password is: **cisco**

Enable password is: **class**

Discover the Topology of the network using the Cisco IOS commands. List the commands you used:

Identify each WAN connection as a DTE & DCE side (eg: LAB_A Serial1 is DTE, LAB_B Serial0 is DCE).

Show the following for all devices discovered:

- Name
- Type of interface
- Platform
- Interfaces
- State of interfaces
- IP addresses of interfaces

Draw the topology of your network:
